***Examiner's Amendment***

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

2. The filed abstract is too long; copy of a new abstract by the Examiner is enclosed herewith.

***Reasons for Allowance***

The following is an examiner's statement of reasons for allowance: the invention relates to process of making tocopherol acetate comprising C- or O-alkylation of trimethylhydroquinone-1-acetate with phytol or isophytol in the presence of a catalyst, and subsequently converting the intermediate product to tocopherol acetate. The closest prior art of Baak et al., EP 0 949 255 A1, discloses similar C-alkylation process for making tocopherol instead of tocopherol acetate as in the instant invention. A second prior art of Shchegolev, et al., discloses similar O-alkylation process but ZnCl and decane are used. Neither ZnCl nor decane is used in the instant process.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue
